

PREPARE FOR WILDFIRES SERIES

Recognize Warnings and Alerts

Have several ways to receive alerts. Download the FEMA app and receive real-time alerts from the National Weather Service for up to five locations nationwide. Sign up for Smart 911 and be aware of the Emergency Alert System (EAS) and Wireless Emergency Alert (WEA), which requires no-sign up.

Pay attention to air quality alerts.

Make an Emergency Plan

Make sure everyone in your household knows and understands what to do if you need to quickly evacuate.

Don't forget a plan for the office, kids' daycare and anywhere you frequent.

Strengthen Your Home

Use fire-resistant materials to build, renovate or make repairs.

Find an outdoor water source with a hose that can reach any area of your property and create a fire-resistant zone that is free of leaves, debris or flammable materials for at least 30 feet from your home.

Know your Evacuation Zone

You may have to evacuate quickly due to a wildfire. Learn your evacuation routes, practice with household, pets and identify where you will go.

Follow the instructions from local authorities. They will provide the latest recommendations based on the threat to your community and appropriate safety measures.
