

# STAY SAFE DURING WILDFIRES

Evacuate immediately if authorities tell you to do so

Check with local authorities for the latest information about public shelters or check open locations on the FEMA app. You can also download the free Red Cross Emergency app for a list of open Red Cross shelters in your area.

Consider making plans with friends or family to shelter with them where you may be safer and more comfortable.

**SWIPE FOR MORE**

**If trapped, call 9-1-1 and give your location, but be aware that emergency response could be delayed or impossible. Turn on lights to help rescuers find you.**

## Use an N95 mask to protect yourself from smoke inhalation or limit your exposure to smoke by doing the following:

Choose a room to close off from outside air and set up a portable air cleaner or filter to keep the air in this room clean even when it's smoky in the rest of the building and outdoors.

Use high efficiency filters in your central air conditioning system to capture fine particles from smoke. If your system has fresh air intake, set the system to "recirculate" mode and close the outdoor intake damper.

If you are not ordered to evacuate but smoky conditions exist, stay inside in a safe location or go to a community building where smoke levels are lower.

**If you are sick and need  
medical attention,  
contact your healthcare  
provider for further care  
instructions and shelter  
in place, if possible.**
